## Summary

| Chapter                                    | Description   |
|--|---|
| 1 Overview                                 | Introduces the basic information about the version.                                 |
| 2 Hardware Requirements                    | Introduces the information about the hardware.                                      |
| 3 BOOT/EPLD Requirements                   | Introduces the mapping version of the BOOT file.                                    |
| 4 Precautions                              | Introduces some precautions for the upgrade.  |
| 5 Updates in Software Functionality        | Introduces changes in the software.   |
| 6 Updates in Hardware Functionality        | Introduces changes in the hardware.   |
| 7 Updates in Command Line                  | Introduces changes in the command line including adding, modification and deletion. |
| 8 Solved Problems                          | Introduces the problems solved.   |
| 9 Unsolved Problems and Avoidance Measures | Introduces the problem not solved and the corresponding avoidance measures.         |
| AppA Memory and CPU Usage                  | Introduces the memory and CPU usage.  |
| AppB Matching EMS Version                  | Introduces the matching EMS version.  |
| AppC Matching MIB File                     | Introduces the matching MIB file.   |
| AppD Automatic Inspection Templates        | Introduces the mapping automatic inspection templates.                              |
