

Social insurance

2

- Social Insurance = government transfers based on events which cause a loss of income
- Examples are unemployment, disability, pension, health benefits...
- Social insurance is the biggest and most rapidly growing part of government spending
- Government spending has shifted towards social security and health insurance in particular.
- Expected increase in social spending causes worries about future solvability.

Social justice and insurance

4

- **Social justice is achieved when people are provided with complete insurance whereby people who fare well in life fully compensate those who do not fare well – because of the full compensation, after the net transfers predicated on insurance, all people have equal ex-post incomes.**
- **The definition of social justice is therefore ex-post equality:**
- **With future income uncertain, insurance protects against the possibility of having low income in the future.**
- **Achieving social justice is the reason for having social insurance.**

Social justice and insurance

5

- Social insurance pools risks of risk-averse individuals
 - ▣ Unemployment: loss of earnings due to involuntary unemployment
 - ▣ Disability: loss of earnings due to injuries/disabilities
 - ▣ Social security annuity: loss of earnings at old age
 - ▣ Health: risk of health shocks/expenses

Outline (part I)

6
